

SupexBond™

REVOLUTIONALIZING THE FLOORING INDUSTRY:

SupexBond™ 3-IN-1 System is an environmentally friendly product, as it contains NO VOC's (Volatile Organic Compounds). It is an acoustical membrane, polyurethane adhesive, and moisture barrier all wrapped up in one system. SupexBond eliminates the traditional, multi-step process needed for traditional glue down hardwood flooring installations requiring an acoustical membrane, and it is virtually odor free!

Simply mix Supexbond™ 3-IN-1 two part system, directly on the floor, spread it with a notched trowel and you are ready to start laying your flooring. It can be applied directly to concrete, and plywood subfloors. For all other subfloors, please contact us prior to doing your installation.

SUPEXBOND ONE-STEP APPLICATION ELIMINATES THE FOLLOWING COSTS:

- ❖ Cost to install a membrane such as cork, foam, recycled rubber, etc.
- ❖ Cost of the actual membrane.
- ❖ The time required for application and curing of the adhesive in a multi-step glue down application.
- ❖ Cost for a separate application of a moisture barrier, or sealant for "on grade" or "below grade" slabs.

RESIDENTIAL OR COMMERCIAL USAGE:

SupexBond™ 3-IN-1 System can be used for residential and commercial applications.

Features & Benefits

- No VOC (0.00%/vol.)
- Creates an acoustical membrane, which is normally required in condos, apartments and commercial buildings.
- Moisture Barrier/Highly water resistant
- Strong bonding flooring adhesive
- Can apply directly to concrete (max. moisture content up to 6%)
- One step application system (Reduces overall installation cost)
- No Flash time required
- Virtually odor free
- Spreads easily
- Two Hour open time
- Ten – Twelve Hour cure time
- Non-Flammable (Per ASTM-D-635-03)
- Easy clean up
- High Elongation
- Limited Warranty
